

GET THAT HAIRSTYLE!

Want to look like Selena, Miley or Taylor? **SONNY WITH A CHANCE** Hairstylist Jani Kleinbard shares tips on how to do their 'dos.

DEMI'S BIG HAIR

"After shampoo and conditioning, towel dry and apply a hair glaze, such as IT&LY's Purity Design Pure Glaze, from roots to ends. Starting at the back section of the hair from the bottom, use a large, round, boar bristle brush. Concentrate on blow-drying from the roots first, lifting the hair high up, away from the scalp, for high volume. Make sure the hair is completely dry. To achieve a bend at the ends, leave the brush in for a few minutes until completely cooled. After hair is dry, tease the hair using a teasing comb, holding the hair tight and teasing at the roots. Lightly spray, let dry and comb; then spray hair while [holding your head] upside down, running your fingers through it to give it texture. Spray lightly."

GOING BIG: Demi pumps up the volume!

UP AND AWAY: Taylor rocks a totally glam look.

TAYLOR'S UP 'DO

"For soft, natural texture and volume, apply a styling mousse, such as IT&LY's Purity Design Pure Style Mousse, on towel-dried hair and proceed with blow-drying. Use a diffuser attachment. Starting from the end, push up to the roots with your head tilted. Do not over-dry. When your hair is nearly dry, apply a texture spray for hold and additional shine. For the pieces of hair that need a little more curl, use a 3/4-inch curling iron and wrap the hair from roots to the ends on the outside of the iron. Then pin the bottom of the back of the hair with bobby pins for the shorter look. Use hairspray, such as Aquage Freezing Spray [available at www.sleekhair.com] to hold it."

SELENA'S CURLS

"Selena's hair type does require attention to hydration, so begin with a hydrating and strengthening shampoo, and conditioner. Towel dry and then apply a mix of three parts Purity Design Pure Creative Gel Strong to one part Pure Water Drops evenly through the hair. Blow-dry with a natural bristle round brush. For more volume, start drying against the natural root direction, softly bending the middle of the hair and ends to the shape. Section the hair from the back and apply a styling wax, such as IT&LY's styling wax, lightly to each piece before curling. Using a 1 1/2-inch curling iron, wrap the hair from the roots, but don't curl all the way to the ends. Separate the curls using your fingertips. You can always put a cute clip in to finish the look."

CURLY Q: Selena makes waves with this cute style.

EMILY'S RELAXED STYLE

"When the hair is lightly damp, apply CHI Silk Infusion [available at Target] to the ends, then spray on CHI Volume Booster, concentrating on the roots. Brush the hair. Section the hair starting at the back and blow-dry the hair with a large, boar hair, round brush until dry. Again section from the back and apply CHI 44 Iron Guard Protection Spray section by section; after each section, use a flat iron until you reach the front. Do the same as the last step, but bend the front slightly away from the face. Brush and finish by lightly spraying with hairspray."

CUTE AND CASUAL: Emily keeps things simple.

LONG AND LOVELY: Miley sports a very natural look.

MILEY'S LONG WAVES

"Miley's look demands proper conditioning. After towel-drying the hair, use a leave-in conditioner, then apply Aquage Fortifying Ultragel [available at www.amazon.com] to the whole head. Apply Aquage Silkening Oil Treatment to the ends. Diffuse it with a sock diffuser, scrunching with your hand while holding the head down until almost dry. Apply Aquage Beyond Body Thermal Spray. Using a extra large curling iron on large sections, wrap the hair from the roots to ends. Let the hair drop without brushing and apply a small amount of Aquage Sea Salt Texturizing Spray. Shake out lightly using the fingertips."

GENERAL TIPS:

"For hair that holds up to the on-demand changes of performance and shooting schedules, these young stars need strong, well-conditioned hair and products that deliver. The first step to any style begins with the right shampoo and conditioner. Use a shampoo and conditioner rich in naturally derived hydrating and antioxidant ingredients, such as IT&LY Hairfashion's Purity Design [www.italyhairfashion.com] fortified with cholla cactus, agave and aloe. These ingredients protect the hair and scalp and also offer thermal protection to protect against heat-styling damage."
